SOLAR SPEEDRACK®

Solar SpeedClip (Patent Pending)

Solar SpeedClips® is a line of accessories designed to simplify connections between brackets and our rails. They also secure wires and cables to the rails, all without the need for tools. We offer universal attachments for connecting our rails to any sub-base surface, such as support beams and roofs. We also offer a tool-less wire clip in the shape of a Carabineer and a simple twist clip with a slot for zip ties. All Solar SpeedClips® accessories are universal, so they can be used in all of our systems. This greatly reduces the number of parts needed for installations.

Twist and Lock System
Faster and Easier Installation

Key Benefits to Distributors and Installers

- No tools required
- Reduces the number of parts needed for installations
- Universal components fit all of our systems
- Excellent value
- Tested for quality
- 25-year limited warranty
